

2009 MIAC / PAL Show was Laserific!

Despite the fact that the MIAC / PAL show was a smaller gathering from recent years due to the challenging economic conditions, the show was a success. We had the opportunity to meet new and existing clients excited to see new products to help them grow their business.

We had a phenomenal response to our new products. The show highlight was the brand new [Microh Pegasus RGB Laser](#) which captured everyone's attention with crisp clean multi colour laser beams. One of the many mesmerizing laser effects gave the essence of water waves floating in the air.

Some of the NEW Microh Laser and LED products that were showcased and earned amazing reviews from our customers included; the [FIREFLY RGY II](#) (a very bright RGY laser), the [LED MAX ZOOM SERIES](#) (powerful 3W LED Par can fixture with zoom options 10 – 60 Degree), the [LED RAZOR45](#) (extremely bright RGBAW LED wash effect). These fixtures were very impressive with production and theatrical clients.

The American DJ [Fusion Bar 2](#), [TRI Phase](#), [Galaxian 3D](#), [PINSPOT LED](#), [Mystic LED](#) and [X-move LED](#) (LED Moving Head) were the top DJ lighting effects for there compact and multi purpose capabilities. While the American Audio Radius 3000 and [SDJ2](#) stole the show as the 2 most innovative and revolutionary audio products, the [Odyssey Black Label road cases](#) also provided a classy professional look to protect your equipment.

The [Professional Audio and Lighting](#) industry is an incredibly fast-moving and fast-changing world in which our customers consistently look to us for new and innovative products. We look forward to introducing more products to our clients at future industry trade shows.
